

NCIS ONCOLOGY GRAND ROUNDS

FEBRUARY

■ 1 February, Fri ■ 1pm – 2pm ■ NUHS Tower Block, Level 7, T07-03/04

Esophageal cancer treatment has improved over the years from surgery alone to multi-modalities such as chemoradiotherapy. Surgical treatment has become less invasive nowadays due to better perioperative care and minimally invasive surgery.

Prof Simon Law is a world renowned surgeon on esophageal cancer. He has published many important landmark papers on esophageal cancer. In this lecture, he will go through with us the recent developments in management of this disease and give his personal view on the future of esophageal cancer treatment.

Esophageal Cancer in 2019: A Surgeon's Vantage Point

Professor Simon Law

Cheung Kung-Hai Professor in Gastrointestinal Surgery
Chair and Chief of Esophageal and Upper Gastrointestinal Surgery
The University of Hong Kong
Queen Mary Hospital
Hong Kong

Chairperson:

Professor Jimmy So, Head & Senior Consultant, Division of Surgical Oncology, NCIS
