

The Australian Society of Medical Imaging and Radiation Therapy's 19th National Conference is held in conjunction with the New Zealand Institute of Medical Radiation Technology (NZIMRT) this year. A must-attend event for medical radiation practitioners (MRPs) across Australasia, this conference promises exceptional opportunities for international networking, knowledge sharing, and professional collaboration.

Held to the theme of "Divergence & Convergence", this conference will explore how divergence allows us to discover and delve into the diverse innovations in the field, while convergence will focus on uniting practitioners from Australia, New Zealand, and beyond to enhance collective expertise and patient outcomes.

## Congratulations to Our NCIS Allied Health Team Selected for Presentations at ASMIRT/NZIMRT 2025!
